ABOUT ME

I'm a professional full stack developer that likes to deliver good solutions to problems.
I like to listen to clients' problems and design solutions that help them.
I'm a clean code enthusiast. I code for humans (not just for machines).
I'm interested in building online tools or websites that can connect people in different ways.
I like to learn about different cultures and languages. I love traveling.

WORK EXPERIENCE

January 2019 - May 2023
MSTECHNOLOGIES for SAN CRISTOBAL SERVICIOS FINANCIEROS | IT Consultant, Angular and C# .Net Full Stack Developer
I've worked as an IT Consultant for San Cristóbal Servicios Financieros. I was a full stack developer in a 5-people team. We were the IT crowd that supports the company. A normal day at work involved meetings, writing user stories, organizing the backlog, coding and so on. We were responsible for taking architecture decisions to deliver solutions and responding to company issues and new business strategies. We did all the activities involved in software development.
I've worked with Angular, C# .Net, Entity Framework, GIT, Azure DevOps, PostgreSQL.

April 2018 - December 2018
MSTECHNOLOGIES | Angular and C# .Net Full Stack Developer
I've worked on a collaborative platform to manage business processes called Hoshin, one of the main solutions of the company. Also, I've worked on projects for different clients. Some of them were solo projects and others were small SCRUM teams. I was responsible for interviewing clients, understanding their problems, capturing requirements, designing solutions and coding them.
I've worked with Angular, C# .Net, Entity Framework, SQL Server, GIT, Azure DevOps, SharePoint.

March 2015 - December 2017
QGOOD | C# .Net Full Stack Developer
QGOOD is a BPM software that an enterprise can use for design and execute their own customized business processes. The software keeps track of the tasks every user must do to accomplish their jobs.
I've worked as a full stack developer in a 12-people team using SCRUM, C# .Net, Aspx, JavaScript, JQuery, HTML, CSS, SQL Server, NHibernate, Linq, TFS, stored procedures and SQL functions.

September 2014 - March 2015
MEDICINE SCHOOL, UNIVERSIDAD NACIONAL DE ROSARIO | Business Analyst (Internship)
I did my first steps doing interviews with people, writing use cases, designing UIs.
I've worked as a business analyst with another student. We were working on an accounting system for paid medical courses taught at the Asociación Cooperadora inside the medicine school.
